DOGEGEMS

DOGEGEMS is the in-game premium currency used to purchase in-game items and earn rewards from playing MetaDogeUnity.

We prioritise the stability of DOGEGEMS as a medium of exchange and for in-game rewards. By providing a stable currency, we remove incentives for non-players to manipulate currency prices through speculation, which could harm the health of the game economy.

As market trends change, we remain agile and adapt our model to ensure the long-term sustainability of the project.

DOGEGEMS is not an on-chain token; it is a virtual game currency. However, it has a fixed value and can be directly redeemed through the gaming studio.

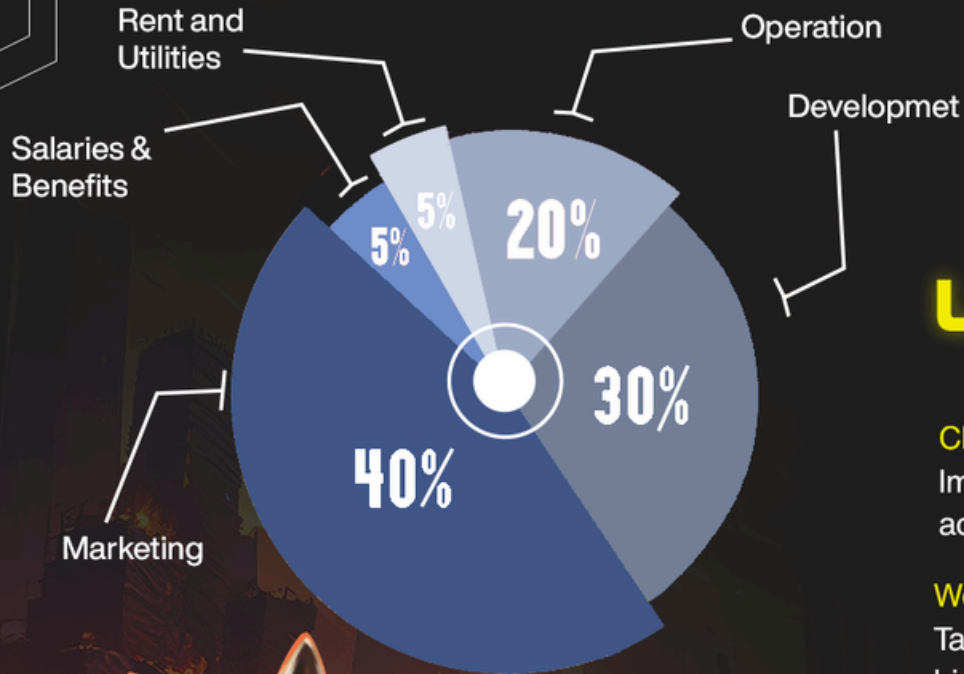

DOGEGEMS redemptions are fully collateralized by our treasury.

Uses of DOGEGEMS:

- Participating in Single Player and Multiplayer Games
- Purchasing In-Game Assets
- Upgrading Weapons and Skins
- Reward Benefits

FUNDING ALLOCATION

LONG-TERM VISION

Cloud-Based Gaming:

Implement a cutting-edge cloud-based gaming solution, enabling users to access the game from any location globally.

Web2 Gamer Onboarding:

Target and onboard millions of web2 gamers onto the platform by offering high-quality AAA blockchain games.

Non-Crypto User Education:

Conduct educational initiatives to inform non-crypto users about the potential of blockchain gaming, showcasing the benefits of passive income through gaming activities.

Expanded User Base:

Strive to surpass 1 million players on the MetadogeUnity gaming platform, reflecting sustained growth and popularity.

Console Integration:

Extend the reach of the game by implementing the Web2 version on popular gaming consoles such as Xbox and PlayStation.
